

Ketchum Tamperproof KL No.3 Steel Ear Tag

Please follow this guide to ensure the tag is fitted correctly

Step 1

Ensure you have the requisite tag, plier and jaws to perform the task

Step 2

Insert the tag into the pliers and seat into the indent. Ensure the tag is seated correctly against the jaws.

Step 3

Manipulate the pliers with a quick CLOSURE SQUEEZE without any pull towards the operator's body until the tag is clinched.

Step 4

Once closed the tag will have securely locked into place.

Kurl Lock No.3 tags are suitable for sheep, goats and pigs
Important - When applying tags, room must be allowed for growth of ears
